

Cell Culture Services

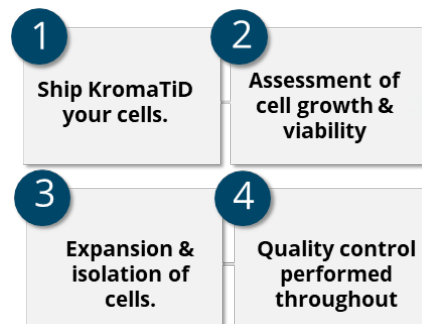

KromaTiD offers cell culture services for iPSC, T and NK cells, and whole blood as well as adherent and suspension cell lines. We perform cell growth and viability assessments as well as services including DNA isolation, mycoplasma testing and metaphase prep and harvest. We can grow and assess primary cells as well as established cell cultures at a wide variety of scales.

Let KromaTiD do the work while you find the answers to your most important research questions.

Working with KromaTiD is Easy!

At KromaTiD, we pride ourselves on providing:

- World-class customer support
- Customized cell culture management
- No capital costs
- Unsurpassed quality control

Catalog Number	Service Descriptions	Cost
SER-001	Adherent & Suspended Cell Lines Services (5 samples)	\$2,544
SER-002	T-Cell Culture Services	\$1,788
SER-003	iPSC Cell Culture Services	\$1,925
SER-004	Whole Blood Cell Culture Services	\$1,375
SER-005	Health & Viability Assessment Culture Services (5 samples)	\$1,000
SER-006	DNA Isolation from Cell Culture (5 samples)	\$1,500
SER-007	Metaphase Preparation on Slides (5 samples)	\$1,125
SER-008	Metaphase Spread Preparation from High Res Chromosomes (5 samples)	\$1,196
SER-009	Mycoplasma Testing for Cell Culture Service (5 samples)	\$500
SER-010	Growth Rate Assessment	\$2,500

Customer Notification

1. All Products and Deliverables are supplied for internal scientific research purposes only and are not intended for i) human consumption, including, but not limited to, foods or pharmaceuticals, ii) diagnostic purpose including, but not limited to, human or veterinary *in vivo* or *in vitro* diagnostics, or use in cosmetics or other goods. Research purposes means *in vitro* laboratory studies or *in vivo* use in laboratory organisms only.
