Study Objective	G-Banding
Project Start Date	04/15/2024
Report Date	04/26/2024

I. G-BAND ASSAY

Assay	Standard G-banding SOP-0068.4
Test Description	<p>G-banding with trypsin treatment and Giemsa stain (GTG-banding) is used in cytogenetics to produce a visible karyotype by staining metaphase chromosomes. This technique allows each chromosome to be distinguished by its characteristic banding pattern. G-banding is useful in assessing structural abnormalities in individual chromosomes, as well as extra or missing chromosomes within a cell.</p> <p>Industry-standard protocols are used to score events (ISCN 2020: An International System for Human Cytogenomic Nomenclature). Events for this report are listed by type and prevalence.</p> <p>Appendix A contains a list of all event types evaluated. Appendix B contains a list of all unique events with their observed counts.</p>

Table 4: Event rates for Project-specific chromosomes

Chromosome	# Events	# of Cells	% of Cells
16	1	1	1

Summary of Results:

Sample karyotype is 100.0% diploid, with non-recurrent aneuploidy observed in 13.0% of cells.

Non-recurrent aneuploidy observed should be regarded as random loss/gain of a chromosome.

Structurally rearranged chromosomes were detected in 12.0% of cells. Events with occurrence in over 15% of cells are considered recurrent.

A summary of observed events is included in Appendix B.

Appendix A. Table of karyotyping abbreviations

Abbreviation	Definition
ace	Acentric fragment
add	Additional material of unknown origin
c	Constitutional anomaly
chrb	Chromosome break
chtb	Chromatid break
cth	Chromothripsis
del	Deletion
der	Derivative chromosome
dic	Dicentric
dmin	Double minute
dup	Duplication
end	Endoreduplication
fra	Fragile site
h	Heterochromatin, constitutive
hsr	Homogeneously staining region
i	Isochromosome
idic	Isodicentric
ins	Insertion
inv	Inversion
mar or M	Marker chromosome
minus sign (-)	Loss
multiplication sign (x)	Multiple copies of same abnormality
plus sign (+)	Gain
qr	Quadriradial
r	Ring chromosome
t	Translocation
tr	Triradial
